PREFACE

This profile on the coffee sector in Italy is the third in a series of Member country coffee profiles. It meets one of the objectives of the International Coffee Agreement 2007, specifically collecting, disseminating and publishing economic, technical and scientific information, statistics and studies, as well as the results of research and development in coffee matters. These objectives have been reinforced by the recent recommendations of the Working Group on the Strategic Review.

On this basis, guidelines have been provided to be used as a framework for this series, which aims to provide comprehensive and current information on the coffee sector in specific countries. These profiles are extremely important in improving the visibility of the world coffee economy and identifying key trade flows.

I would like to thank the senior management of the *Comitato Italiano del Caffè* and its technical staff for preparing the first draft of this report. I would also like to thank the ICO Secretariat for editing the text and collaborating with the coffee authorities in the preparation of the Country Coffee Profile for Italy.

I sincerely hope that this profile will be of interest and value to our Members, as well as all other stakeholders working in the field. Finally, the ICO staff and I remain open to any observations and suggestions that will assist us in increasing the accuracy and value of the document in the future. I am confident that the wealth of information contained in this publication, and those to follow in this series, will provide delegates, researchers and readers with a better understanding of the dynamic nature of the coffee industry worldwide.

José Sette
Executive Director
International Coffee Organization

Milan, 2017-07-18

Subject: Italian Coffee Profile

This study was conducted by the Comitato Italiano del Caffè, with the support of the University of Turin, in collaboration with the International Coffee Organization, as part of the Coffee Profiles Programme.

It is my hope that this study will be of interest and value to the International Coffee Organization's Members and to all stakeholders of the coffee sector interacting with the Italian industry, providing useful support in analyzing sources of supply, coffee trade, consumption trends and coffee stocks.

With regard to the present document, I would particularly like to acknowledge the contribution of Cecilia Casalegno and Valentina Chiaudano (University of Turin), Gianni Forni (General Secretary of the Comitato Italiano del Caffè), Maurizio Giulì (President of Ucimac - Espresso Coffee Machine and Bar Equipment Manufacturers), Marinella Cerutti, Federica Scaravaglio and Laura Tondi (Lavazza).

With my kindest regards.

Mario Cerutti
President
Comitato Italiano del Caffè

1. BACKGROUND

1.1 Geographical setting

Italy is a peninsula in the Mediterranean Sea, located in the South of Europe, covering a surface of 302,073 square kilometres. Italy borders France to the West, Switzerland and Austria to the North and Slovenia to the East.

Most of the land is mountainous (35%) and hilly (42%) and the rest is flat (23%). Italy also has numerous islands, the two biggest being Sicily and Sardinia.

Italy is a parliamentary republic that is divided into 7,978 communes, 107 provinces, 14 metropolitan cities and 20 regions, of which 15 are ordinary regions and the other 5 have a special autonomous status. The national language is Italian and the capital is Rome.

Figure 1: Map of Italy

Italy has a density of 201.32 inhabitants/km², with a population of 60.66 million: 48.6% are men and 51.4% are women

1.2 Economic setting in Italy

Italy is one of the twenty-eight member countries of the European Union and adopted the EU single currency – the euro – in 2002. As a consequence, the Italian economy is now influenced by European Central Bank decisions in terms of interest rates, prices and monetary policy. By the same token, Italy has benefited from the Schengen Agreement, which allows free movement of people and goods within European Union Schengen countries.

Italy has a diversified economy composed of an industrial North, dominated by private companies, and a less industrial but more agricultural South, with a fairly high unemployment rate.

The Italian economy is mainly driven by a high-quality consumer goods manufacturing sector made of small- and medium-sized family businesses.

Despite its third position in the ranking of European economies, a high public debt and structural impediments to growth have rendered Italy vulnerable to scrutiny by financial markets. Public debt has increased since 2007, reaching 133% of GDP in 2016.

Since 2011, after the general recession in Europe, Italy's economy has returned to a modest growth. In 2015 and 2016, Italy's economy grew at an annual rate of 0.7%. In 2016 the overall unemployment level was 11.7%, although youth unemployment has remained high at 37.1%.

1.3 History of coffee in Italy

Coffee was introduced in Europe in the 16th Century when its use was reported by a number of travellers from the East. These included a Venetian named Prospero Alpino, a botanist and doctor, whose book *De Plantis Aegypti* contained an illustration of the coffee plant. He described the Eastern habit of taking “this excellent black drink which is in flavour similar to chicory”.

Although the power of Venice was already declining, historians agree that Venetian merchants were already importing coffee in 1695. The beans, which were loaded at the port of Mocha in the Arabian Peninsula, were unloaded at Venice and originally sold through pharmacies for medicinal purposes.

Soon however, the Venetians learned how to roast coffee beans and began drinking coffee both at home and at the *botteghe del caffè* (coffee shop). In 1683 the first coffee shop in the Western world was opened in Venice under the porticoes of St. Mark's Square. One century later, there were over 200 of them in the city.

'The Coffee Shop' (*La Bottega del Caffè*), a comedy by Carlo Goldoni, one of Venice's most famous playwrights, was first performed in 1750 and provides a flavour of those coffee shops and how their customers drank coffee.

At first, the Catholic Church opposed coffee drinking. As it was a Muslim drink, a number of priests appealed to Pope Clement VIII to ban it. The story tells that Pope Clement tried the 'devil's brew' and decided that it was 'so delicious that it would be a sin to only let infidels drink it', and then renamed it a 'Christian drink'. Thanks to the Pope's favour, the popularity of coffee grew rapidly in Italy, not only among the aristocracy, who drank it in their drawing rooms, but also among the rest of the population. Coffee was sold by street vendors together with lemonade and chocolate drinks.

Coffee shops appeared in Rome, Turin, Genoa, Milan, Venice, Padua, Naples, Florence and Trieste, and became famous meeting-places for the educated, including writers, politicians and students over the centuries ahead.

In the 21st Century, coffee consumption has continued to be in vogue among Italians who drink coffee not only in coffee shops, but also at home, thanks to the introduction of new types of coffee machines and capsules.

Over the years, coffee capsules have become increasingly popular, exceeding 1 billion euros in value in 2015.

In 2015 Italy hosted two important coffee events: the 1st Global Coffee Forum and the 1st International Coffee Day, both organized in Milan during Expo Milano 2015, the international exhibition on nutrition and food.

The Comitato Italiano del Caffè, the ICO, Expo and Fiera Milano Congressi organized the Global Coffee Forum in collaboration with the Italian Ministry of Agriculture and the Italian Ministry of Industry.

This event aimed to discuss the three virtues of coffee: pleasure, health and sustainability. The International Coffee Day was an occasion to promote and celebrate coffee as a beverage. A photographic exhibition was installed in the Milan city centre in order to attract visitors to the coffee world.

During the event, Oxfam organised fund raising activities using an imaginary '*caffè sospeso*'¹ – a typical Neapolitan coffee tradition.

¹ '*Caffè sospeso*' is a Neapolitan tradition by which a coffee consumer pays for an extra coffee in a coffee shop. Thus, this coffee will be available for anyone who cannot afford it.

2. COFFEE IMPORTS FROM 2000 TO 2016

2.1 Volume of imports

In 2016 Italy imported more than 10 million bags² of coffee. Total imports increased by 9.5% between 2015 and 2016.

In 2015 Italy was the second largest importer of green coffee in terms of volume in Europe, accounting for 14% of total European imports (Germany was the largest European importer with 29%)³.

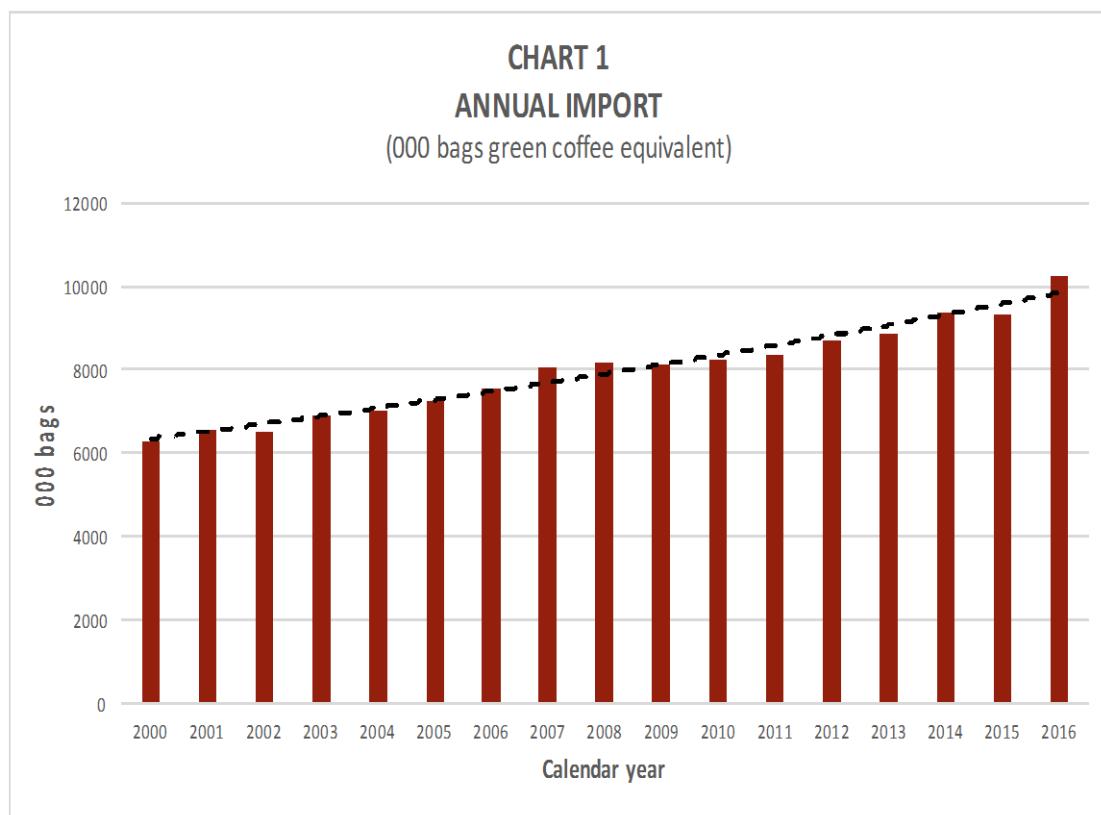

On a world scale, Italy was the third-largest green coffee importer in 2015 (after the USA and Germany)⁴.

Chart 1 illustrates the trend of total annual imports of coffee from 2000 to 2016.

Source: Comitato Italiano del Caffè/ISTAT

In 2000, total annual imports of coffee were 6.3 million bags. Since then, imports have continuously grown and reached 10.2 million bags in 2016 (Table 1). As Table 1 shows, except for ‘coffee preparation’, which decreased slightly from 2015 to 2016, every form of coffee has undergone constant growth in volume.

Since 2000, Italy has imported mainly green coffee: in 2016, this value reached 93% of total imports.

Since 2002, more than 50% of green coffee imports have been supplied by only two exporting countries: Brazil and Vietnam. According to ISTAT (Istituto Nazionale Statistica) data, in 2016 Brazil accounted for 31% (more than 2.94 million bags) of total green coffee imports by Italy, Vietnam for 22% (2.13 million bags) and India for 12.82% (1.22 million bags).

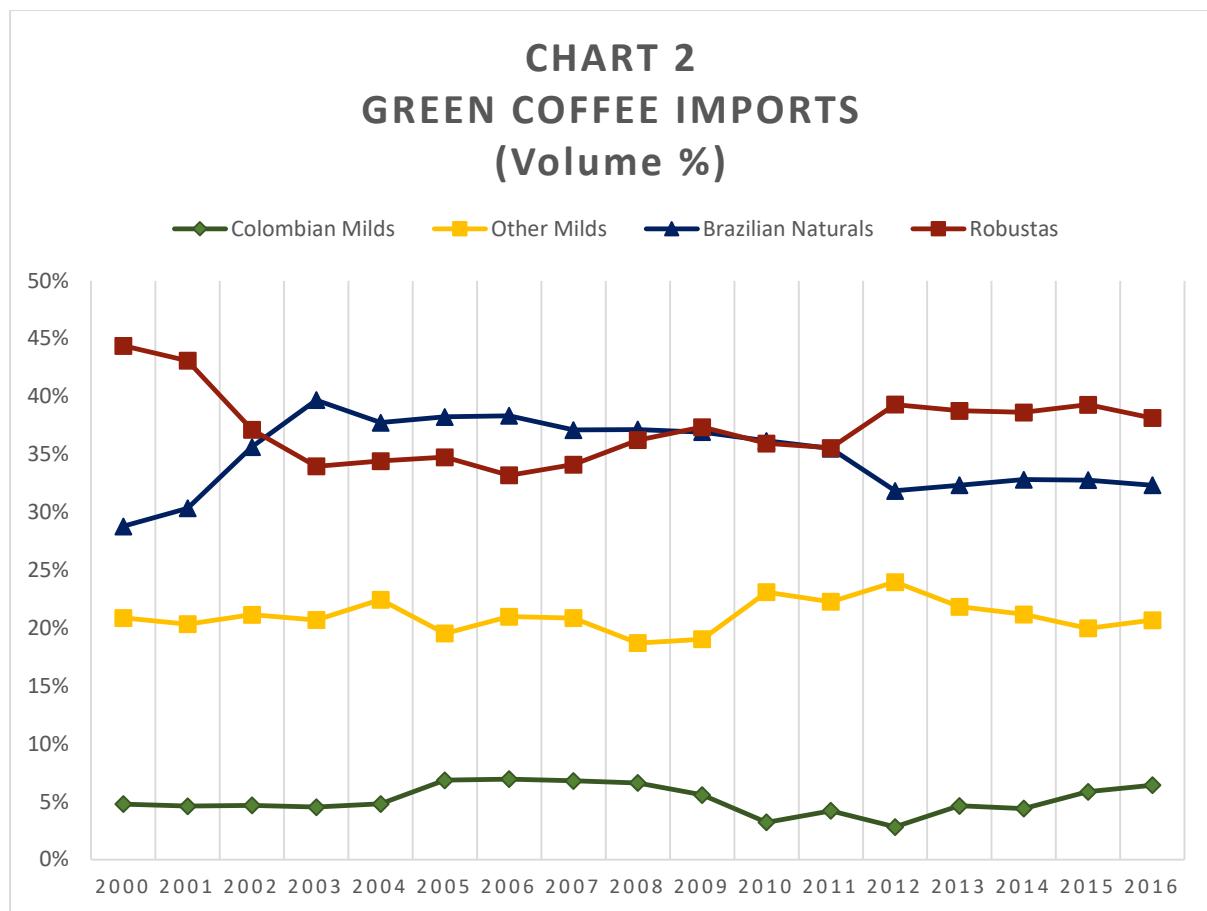

Other significant green coffee producers that export to Italy are Uganda, Indonesia, Colombia and Honduras.

Table 2 shows details of Italian imports of green coffee in the period between 2000 and 2016.

In addition to its direct imports from coffee-producing countries, Italy also imports green coffee from European hubs. In 2016 Germany was identified as the main European supplier of green coffee, followed by Austria and Belgium⁵.

Annex Table I (attached to this coffee profile) shows Italian green coffee imports by country of origin.

Chart 2 compares Italian green coffee import trends, divided by bean type and market share:

- Robustas and Brazilian Naturals represent the main categories of coffee beans imported in Italy.
- After a fall in import levels from 2000 to 2003 (-10%), Robusta has had a relatively stable trend until 2016 (around 35%).
- Imports of Brazilian Naturals rose from 2000 to 2003 reaching 40% and remained stable until 2011. Imports began to decrease in 2012, reaching a share of around 32% in 2016.
- The share of Colombian Milds remained unchanged at 5% from 2000 to 2016.
- The Other Milds category registered a 20% share from 2000 to 2016.

2.2 Value and unit value of imports

In 2016, total value of coffee imports reached 1.58 billion euro, 4.7% lower than in 2015. Though a fall of about 109 million euros was registered, green coffee still represented 81% of the total value of Italian coffee imports in 2016.

According to ISTAT data, total coffee re-exports (volume) experienced a positive growth trend in the period from 2000 to 2016. In particular, in 2016, Italian coffee exports were about 4 million bags (see Table 5).

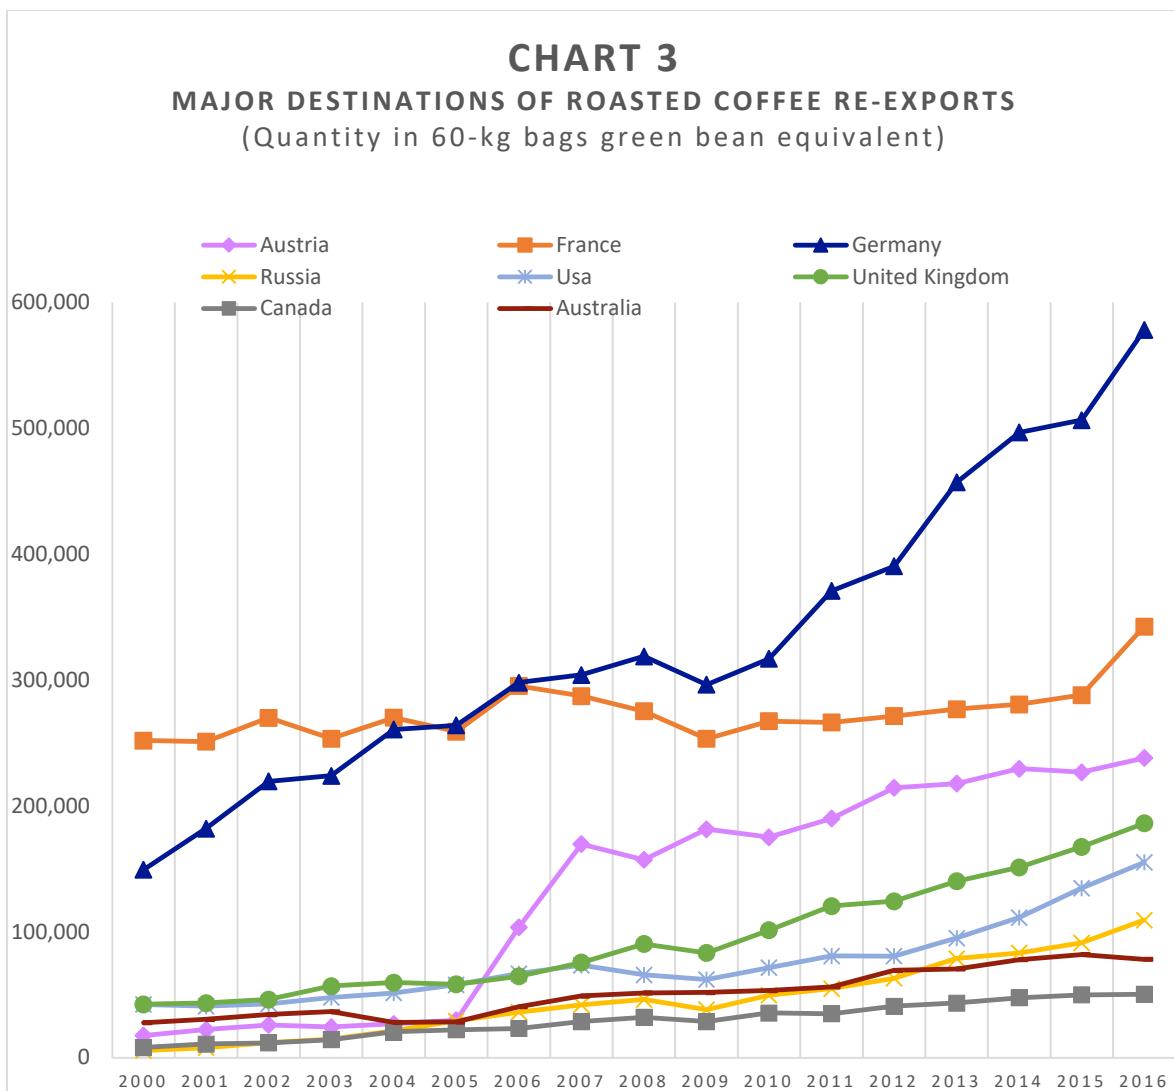

In the same year, roasted coffee, traditionally the main form of Italian coffee re-export, reached 3.8 million bags.

Germany, France and Austria were the major destinations of coffee processed in Italy and together they represent 30% of the total Italian roasted coffee exports. Among non-EU countries, Switzerland, the USA, Australia, the Russian Federation and Canada are the major importers of coffee processed in Italy (see Chart 3).

Moreover, from 2000 to 2016, Italy registered a growth in re-exports towards Eastern Europe, China, the Republic of Korea and Israel, (see Annex Table II)⁶.

⁶ Annex Table 2 (attached to this coffee profile) shows Italian coffee re-exports by destination.

4. COFFEE TRADE AND ROASTING

4.1 Importers

There are three main kinds of coffee importers:

Direct importers (roasters)

Direct importers normally buy at least part of their raw material directly from coffee-producing countries in order to obtain better margins and regular supplies of the required quality.

Agents

Agents provide a range of services for clients, including advice on availability, price and logistics.

Importers of green coffee

Importers of green coffee resell the coffee they buy to small- and medium-sized roasters.

Due to the volatile nature of coffee prices, which makes forecasting, quotations and long-term programming difficult, importers of raw coffee act as buffer stock for the processing industry as they assume the initial market risks, despite their comparatively low margins. In addition to having the requisite experience and business capacity, they assume a considerable capital risk. Apart from occasional re-exports of green coffee, mainly to Europe, sales occur within Italy.

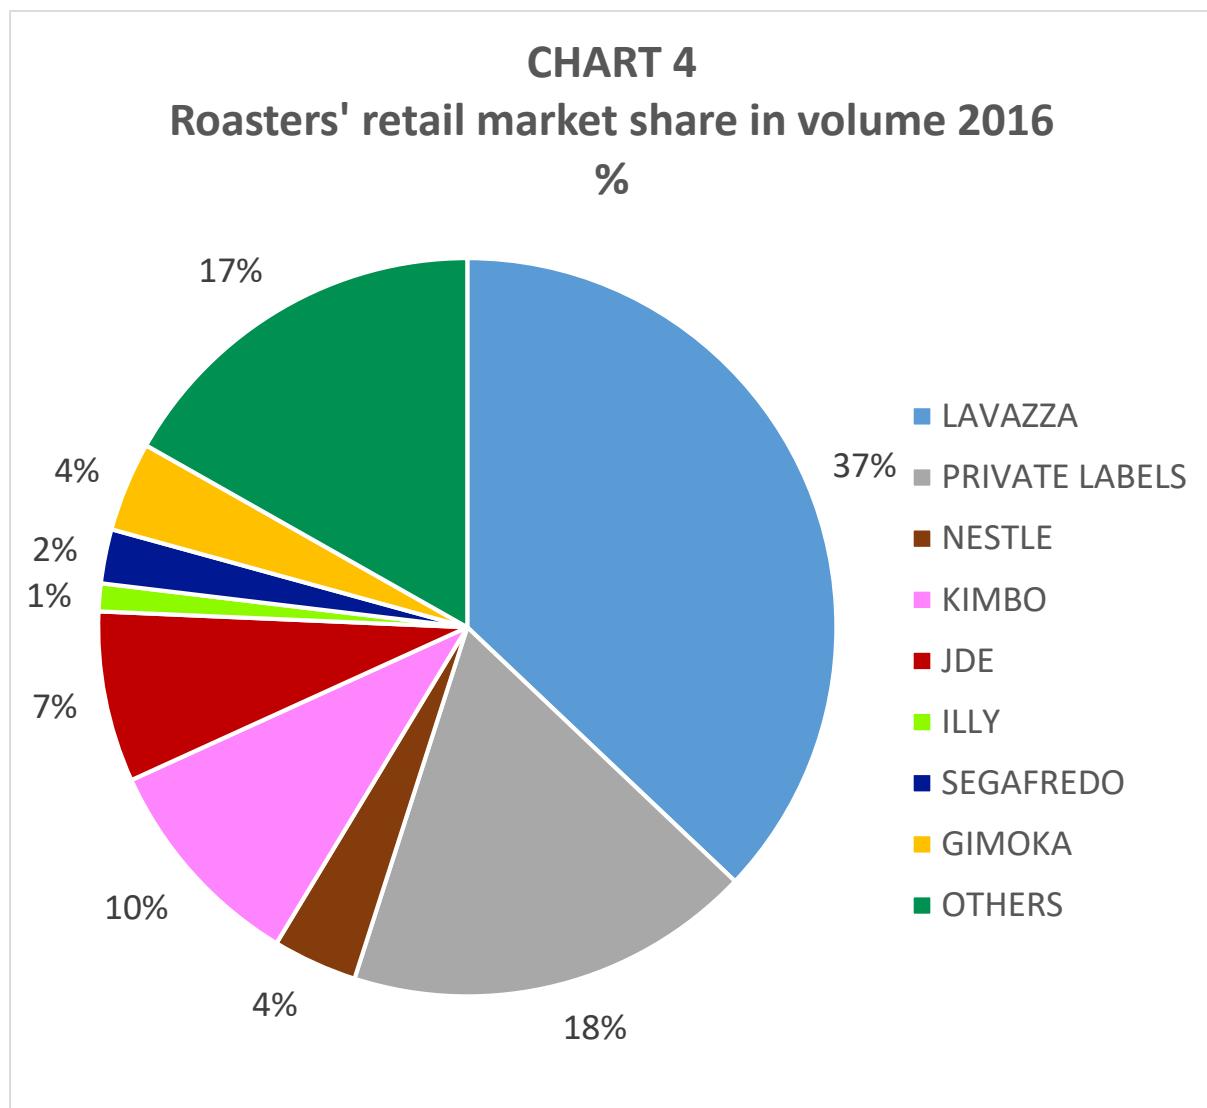

Importers manage sales through local agents. While raw coffee importers are able to meet sudden demands of industrial roasters (who normally source raw materials autonomously), they can also act as agents providing smaller roasters with small amounts of raw material from various sources and of different coffee qualities.

Depending on the type of client, importers will adopt different approaches when marketing raw material. Mailing of lists of physically and shortly available coffee types is standard practice. Importers of green coffee can also sell the product customs cleared, thus providing roasters with a wider range of services (e.g. shipping, insurance, transport, etc.).

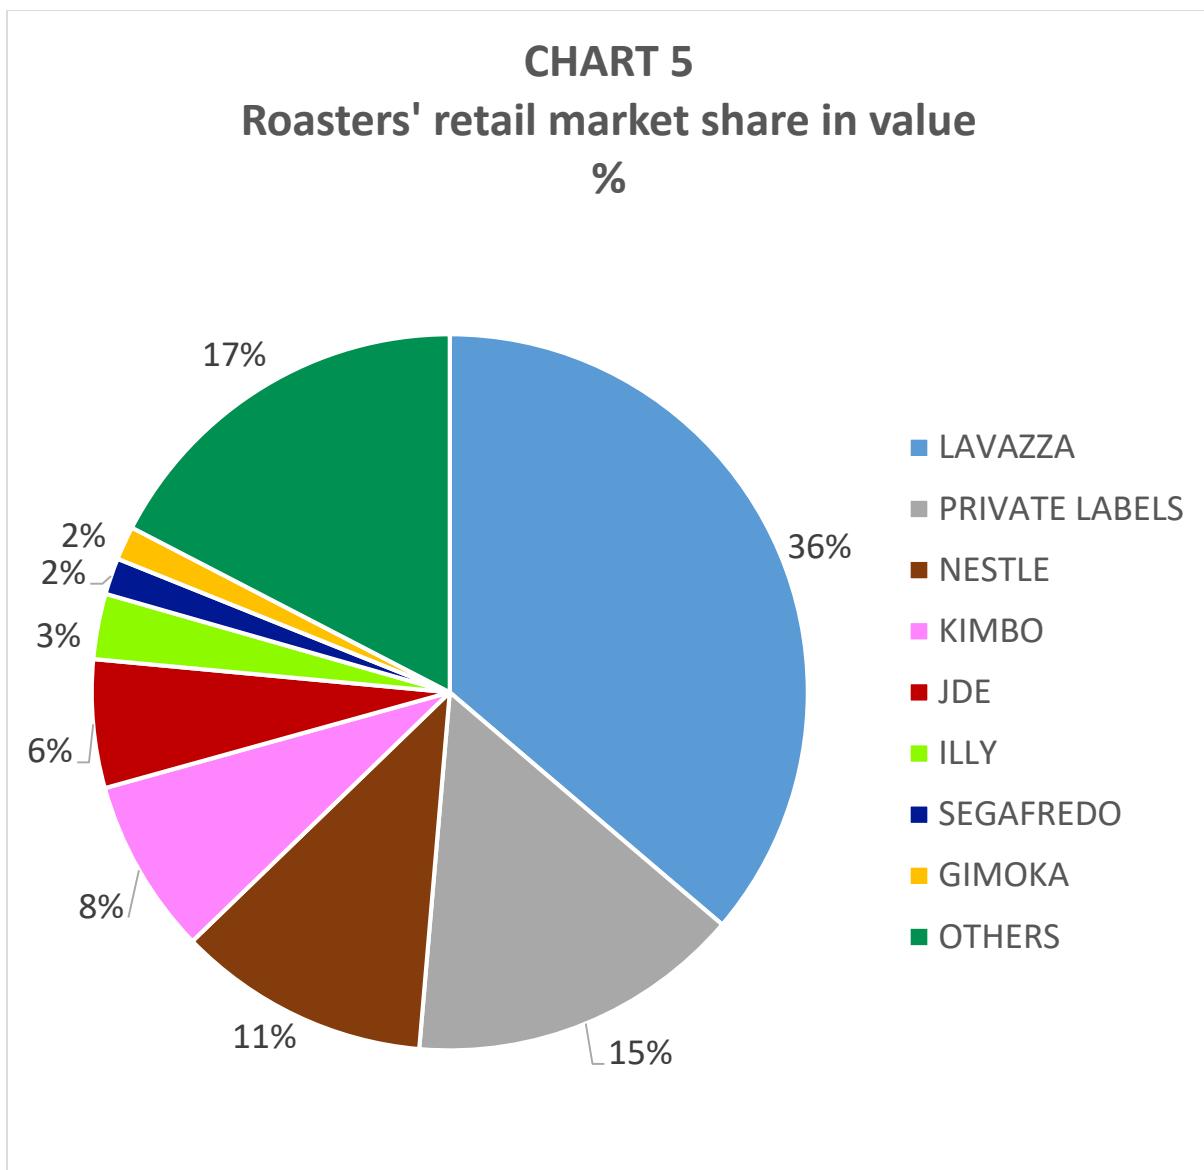

4.2 Roasted coffee

Italian coffee roasters can be classified in three categories⁷:

- Big players that operate nationally and internationally with an annual turnover of more than 100 million euro.
- Medium-sized manufacturers and companies with a high market share operating in different Italian regions with over €40 million turnover but less than €100 million.
- Other producers, with less than €40 million turnover operating both locally and internationally.

Source: Calculations based on Coffitalia data, from 2011 to 2016

Table 7 shows the geographical distribution of coffee roasters by region. The number of coffee roasters in Italy grew from 558 units in 2011 to 950 units in 2016.

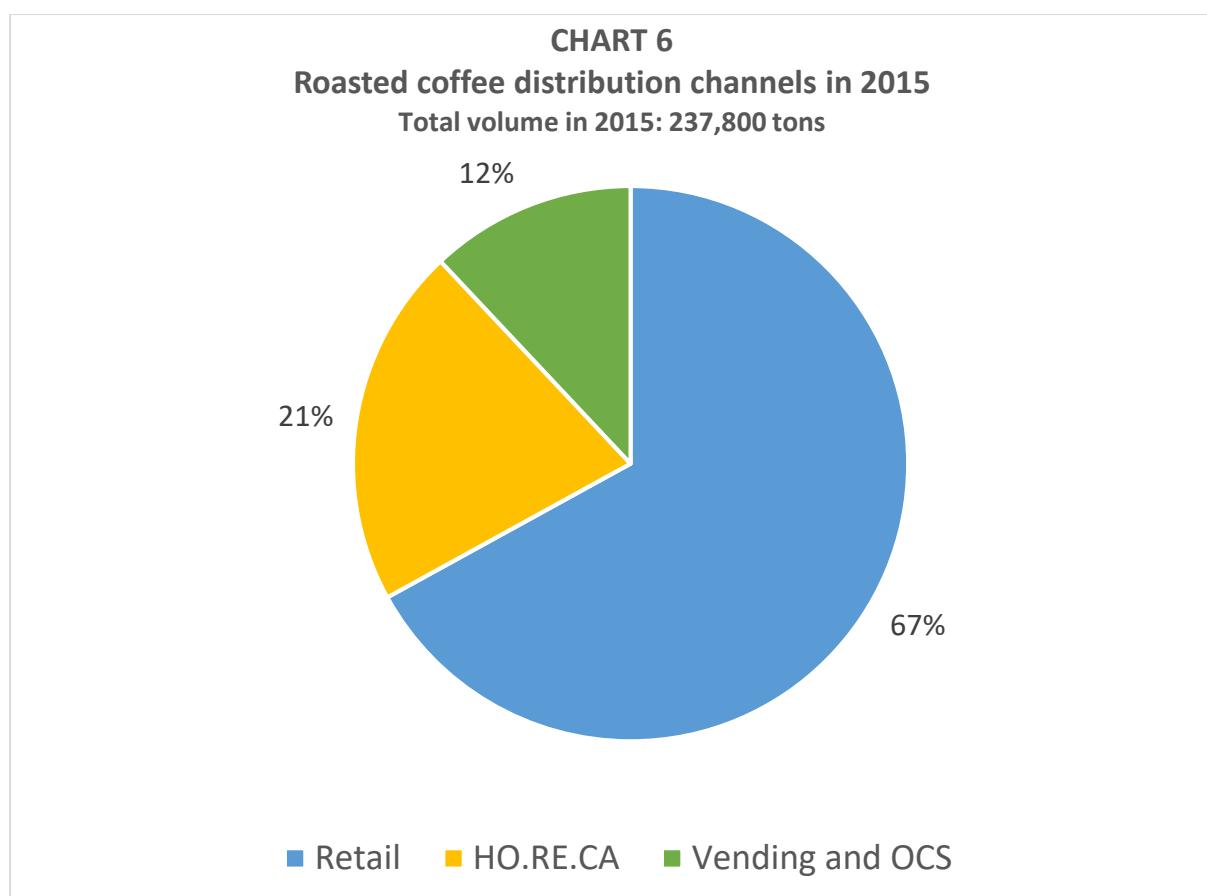

4.3 Associations

The *Comitato Italiano del Caffè* is the representative body of the Italian coffee sector (68 member companies – equivalent to 85% of the Italian market in term of value) and deals with the national, European and international authorities to preserve and enhance interests of different sub-sectors such as the coffee roasting industry, including decaffeinated and instant coffee companies, green coffee trade and warehouse keepers.

The *Consorzio Promozione Caffè* is a *Comitato Italiano del Caffè* body committed to promoting an educational and informational programme on the health effects of coffee, based on published scientific evidence.

UCIMAC is the representative association of the Italian Espresso Coffee Machines Manufacturers and deals with national, European and international authorities accordingly. Moreover, other coffee associations have a regional presence (e.g. *Associazione Caffè Trieste*).

4.4 Marketing channels

Source: *Competitive Data*

The Italian coffee market can be divided into three main coffee marketing channels, based on different purchasing and consumption models:

- Retail channel (hypermarkets + supermarkets + convenience stores + discount stores).
- HO.RE.CA (Hotel, Restaurant and Catering).
- Vending and OCS (Office Coffee System).

4.4.1 Retail

Retail is the marketing channel that refers to domestic consumption. According to Euromonitor, in 2016 coffee retail sales declined slightly in terms of volume from 154,482 tons to 152,165 tons (see Table 8).

On the contrary, 2016 retail sales rose about 2% in current value terms compared to 2015, reaching 1.79 billion euro (see Table 9).

The decrease in volume is a consequence of the longstanding economic crisis that has led to a general contraction in purchasing power, including coffee. However, coffee remains Italians' favourite hot beverage.

In 2015 supermarkets were the main distribution channel, followed by hypermarkets, convenience stores, independent small groceries and discount stores. Consumer preference for supermarkets is directly linked to the wide variety of products offered and competitive prices.

As part of the retail channel, the e-commerce channel is increasingly popular among consumers, especially for purchases of coffee capsules. E-shops offer high quality products at competitive prices.

Table 8 shows coffee trends sales in terms of volume from 2002 to 2016.

Source: Euromonitor International

4.4.2 HO.RE.CA

HO.RE.CA is the marketing channel referring to Hotels, Restaurants and Catering, in other words ‘out of home consumption’.

According to a sectoral study by Competitive Data, the volume of roasted coffee provided by the HO.RE.CA stores (Hotel, Restaurant, Cafes & Bar) and Catering in 2015 is estimated to be 5 million kgs (over 6 billion cups of coffee every year), equivalent to an annual turnover of €6 billion⁸.

The Italian HO.RE.CA channel is composed of hotels and restaurants (53%), coffee bars (46%) and catering (1%).

HO.RE.CA suppliers are numerous and fragmented: as a matter of fact, the top three Italian roasters only provide for 1% of total supply.

Coffee prices in HO.RE.CA are heavily affected by the level of service offered. Service includes very frequent visits to clients by roasters to ensure the product is always fresh, and training, sales and technical assistance are provided regularly.

Roasters are particularly focused on after-sales service to HO.RE.CA and provide the coffee-making equipment on a loan basis, as part of the total service package. It is now standard practice for roasters to maintain and repair the equipment since they are fully aware that good coffee needs not just quality selection but also well-maintained equipment. However, roasters are increasingly focusing on quality and are preparing ever more diversified blends to best meet customer demand

4.4.3 Vending and Office Coffee Service (OCS)

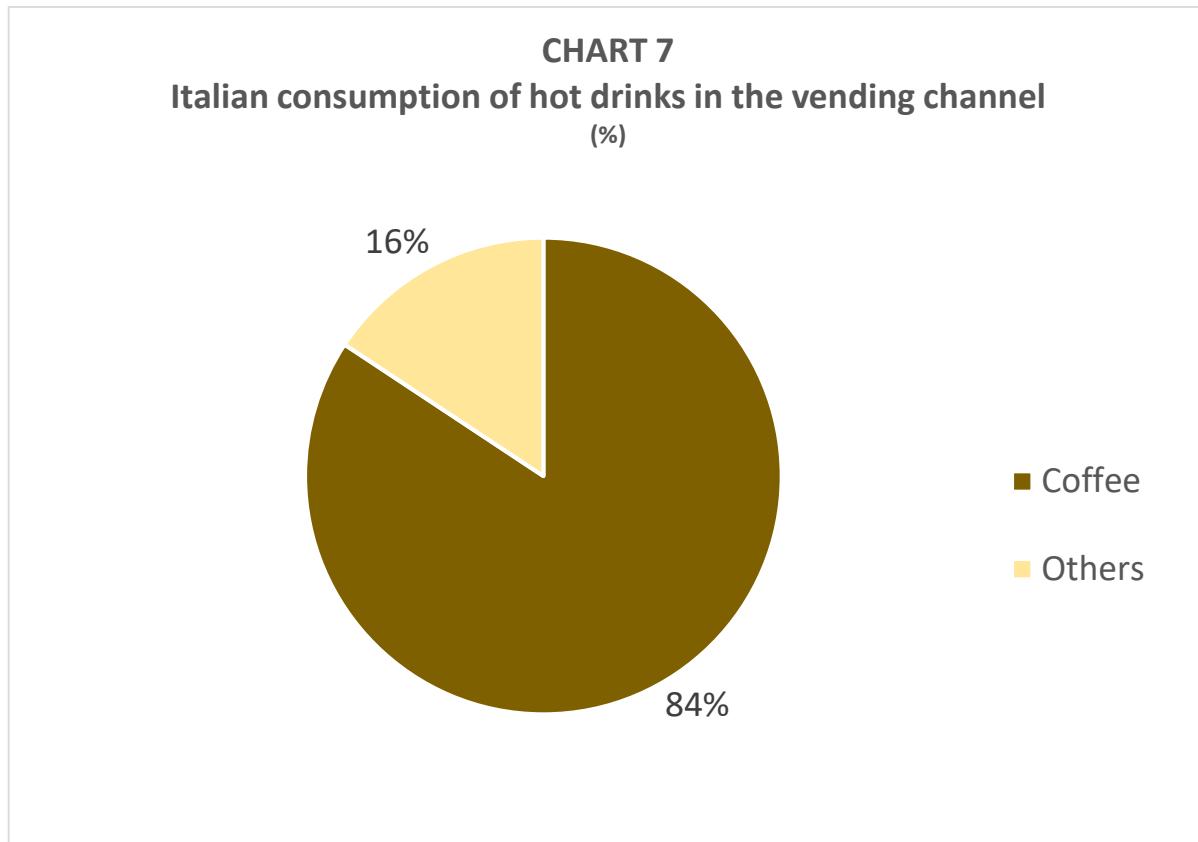

Vending and OCS (Office Coffee Service) refer to out-of-home consumption of coffee.

According to research by Confida, in 2015, 2.7 billion cups of coffee were served through the vending channel, of which 2.2 billion refer to ground coffee, 236 million to single portion (coffee pods) and almost 200 million are related to soluble coffee.

⁸ Coffitalia report 2015-2016

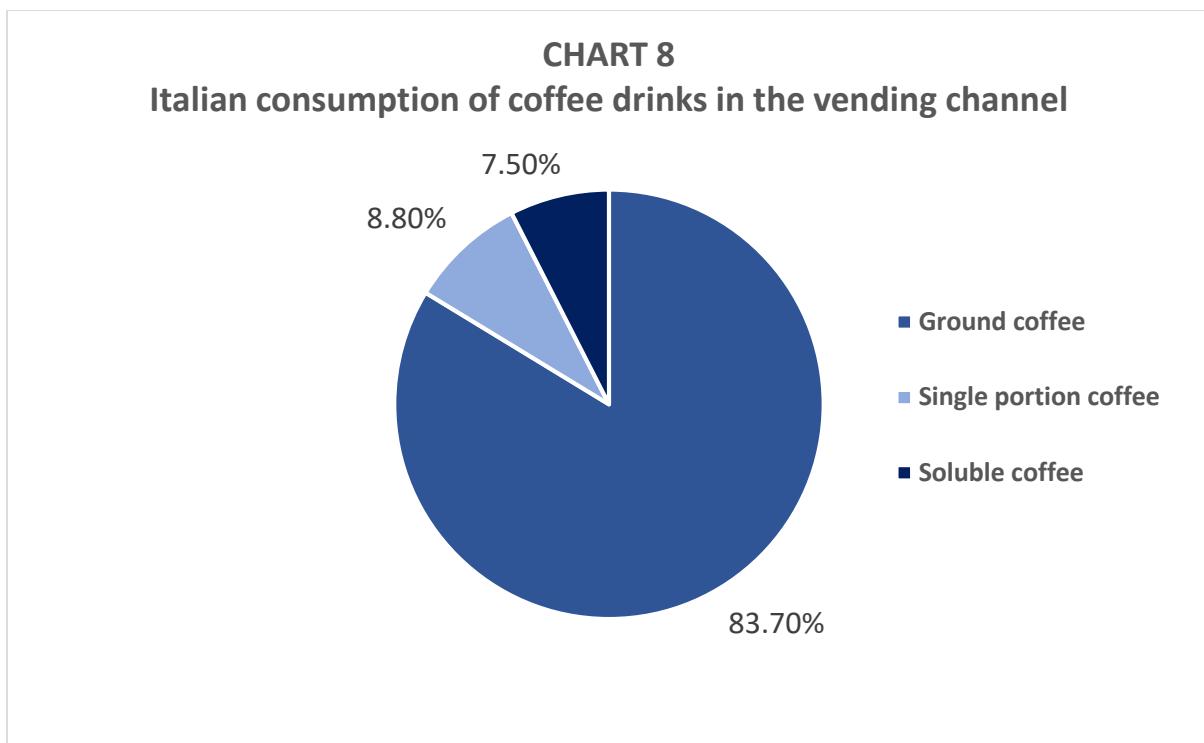

There are two major types of hot drink machines:

- Free-standing machines: large and self-standing. In 2015 there were estimated to be 271,796 in Italy.
- Table top machines to be placed on any supporting surface. In 2015 there were estimated to be around 141,000 in Italy.

Source: Confida 2016

Chart 7 shows the percentage of coffee consumption compared to the total consumption of hot drinks in the vending channel.

Source: Confida 2016

Chart 8 shows the percentages of ground, single portion (coffee pods) and soluble coffee drinks, distributed in the vending channel.

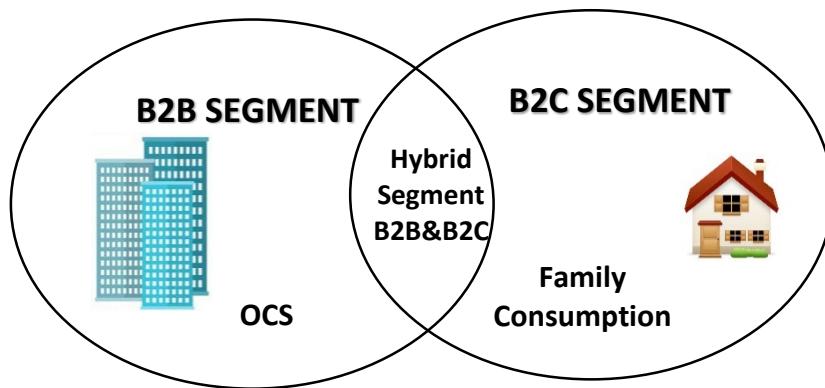

Figure 3: Configuration of OCS channel

Over time, there has been an increasingly strong fusion between the B2B (business to business) and B2C (business to consumer) markets.

Traditionally B2B players served B2C customers. Today new players (retail, e-commerce roasters and importers) have begun supplying B2B channels through B2C capsules. These ‘hybrid’ channels cause an underestimation of the traditional OCS segment, as part of the B2C sales are consumed in the B2B market.

5. DUTIES AND TAXES ON COFFEE

Customs duties vary depending on the coffee country of origin and they are charged, in specific cases (e.g. EBA), according to the agreement between the single country and the European Union (see Table 10).

Table 10: Duties and taxes

	DUTY						VAT		
	Erga Omnes (%)	From	GSP (%)	EBA (%)	GSP+ (%)	Preferential	Oct 1997 – Sept 2011 (%)	sept 2011 – Sept 2013 (%)	From Oct 2013 (%)

6. REGULATIONS APPLICABLE TO COFFEE

In Italy coffee sales and processing are mainly regulated by Presidential Decree 470/73 (the Coffee Hygiene Regulation).

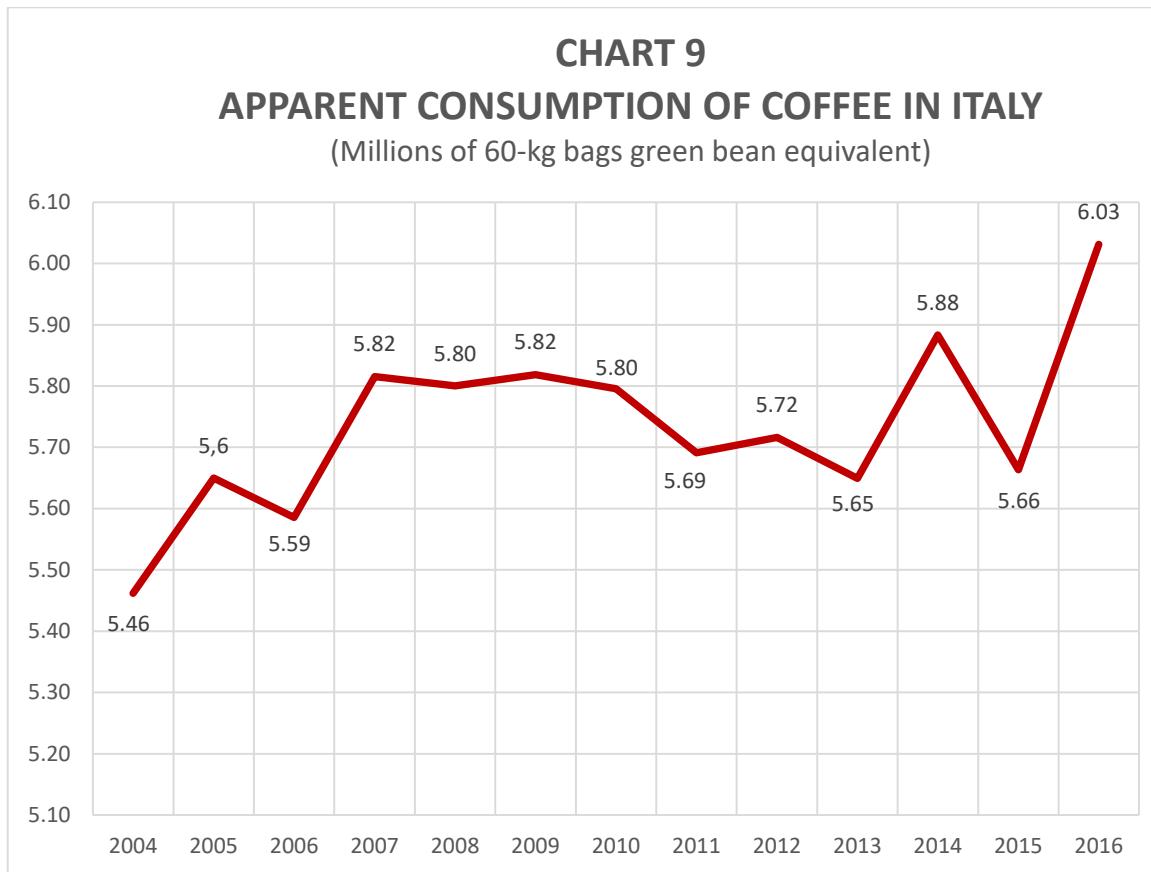

Other laws cover particular types of processing, such as decaffeination, drying and lyophilization (Ministerial Decree 20th May 1976, Ministerial Decree 87/1991, Presidential Decree 774/1982 and Presidential Decree 255/2000).

The following EU main regulations apply in Italy:

- Regulation 852/2004 of the European Parliament and of the Council on the hygiene of foodstuffs.
- Regulation 882/2004 of the European Parliament and of the Council on official controls performed to ensure the verification of compliance with feed and food law, animal health and animal welfare rules.
- Commission Regulation 1881/2006 setting maximum levels for certain contaminants in foodstuff.
- Regulation 396/2005 of the European Parliament and of the Council on maximum residue levels of pesticides in or on food and feed of plant and animal origin.
- Regulation 1169/2011 of the European Parliament and of the Council on the provision of food information to consumers.
- Regulation 1333/2008 of the European Parliament and of the Council on food additives.
- Commission Regulation 231/2012 laying down specifications for food additives.

7. CONSUMPTION OF COFFEE DURING RECENT YEARS

7.1 Apparent consumption

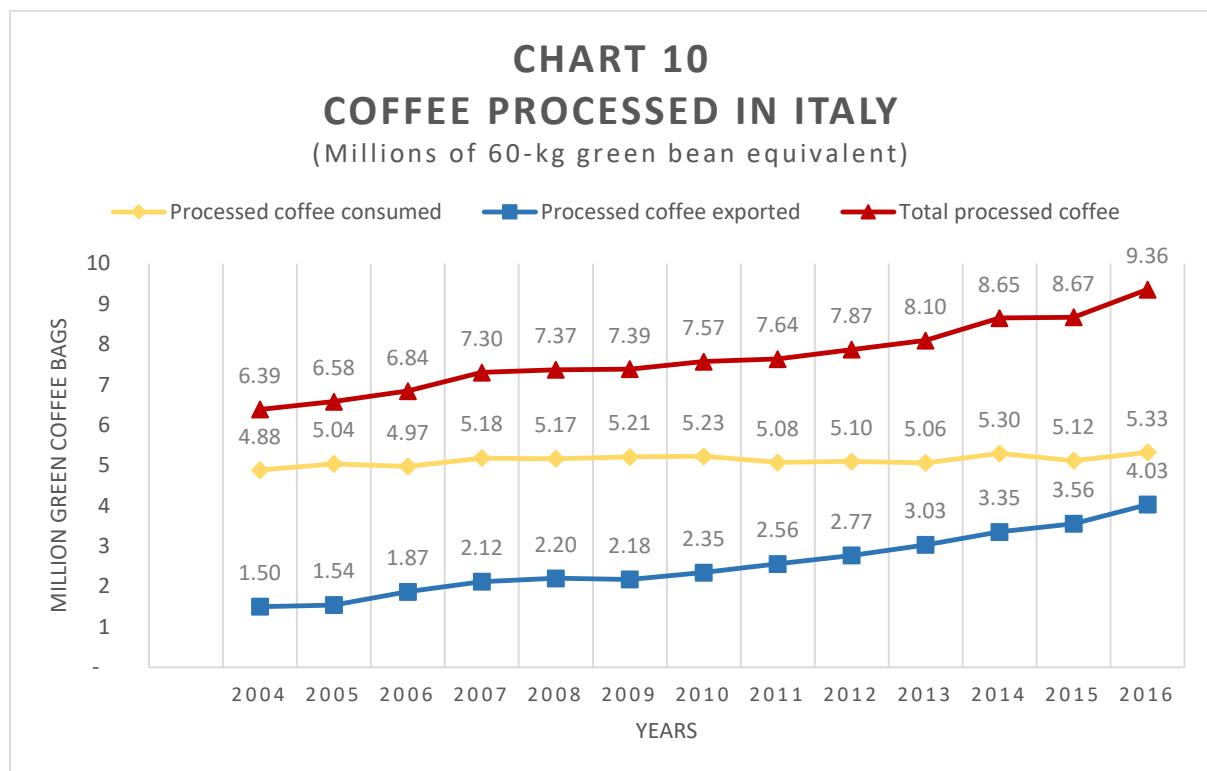

Source: Comitato Italiano del Caffè

The ‘apparent consumption’⁹ of coffee in Italy has shown a volatile trend from 2004 to 2016.

From 5.46 million bags in 2004 ‘apparent consumption’ reached a peak of 5.82 million bags in 2007. In 2013 it fell to 5.65 million bags. In 2014 Italian ‘apparent consumption’ of coffee rose by around 4.13% compared to 2013, but decreased again in 2015. The highest level of coffee ‘apparent consumption’ was reached in 2016, when it was estimated at about 6 million bags (see Chart 9).

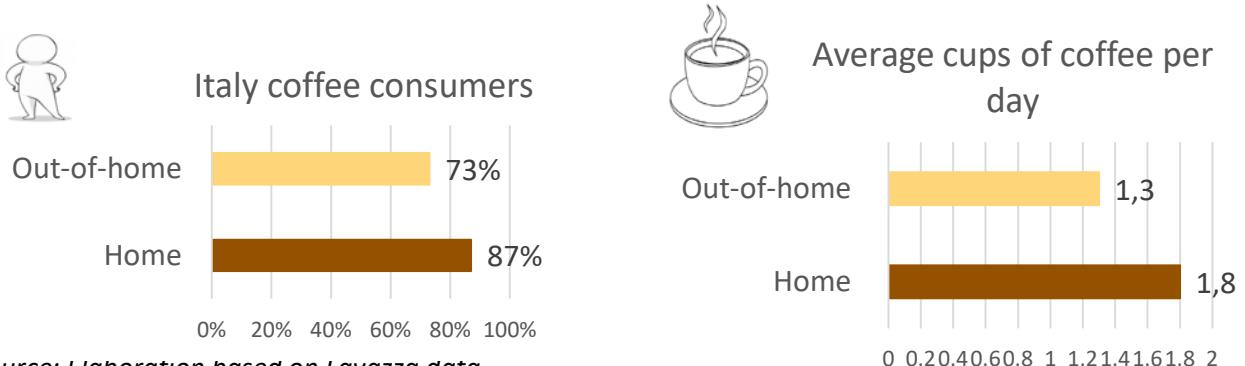

⁹ Apparent consumption is calculated as coffee processed in Italy minus exports of coffee processed in Italy plus Italian imports of coffee processed abroad.

Source: Comitato Italiano del Caffè

However, even if the processing of coffee in Italy continued to increase during these years, consumption in Italy remained stable, while export levels increased (see Chart 10).

7.2 Consumption patterns

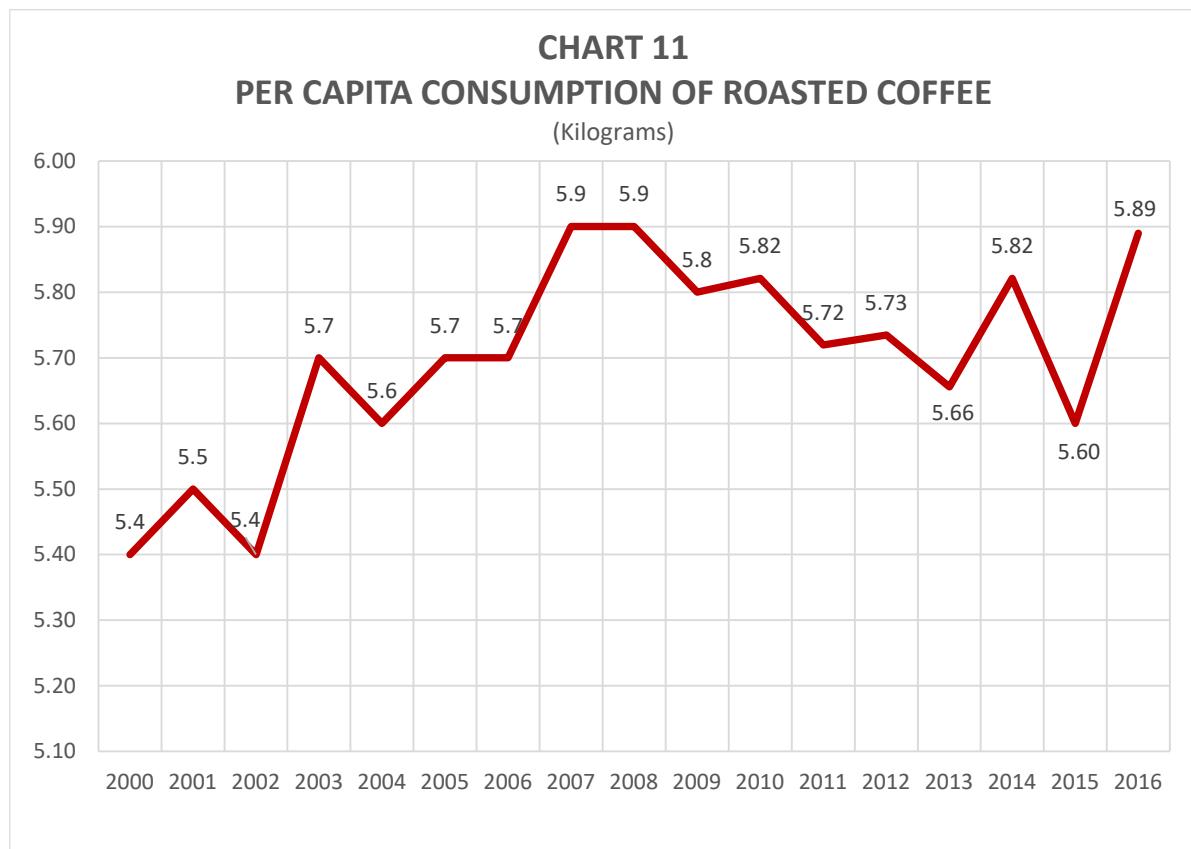

Source: Elaboration based on Lavazza data

According to Lavazza data, in 2016 coffee consumers in Italy were estimated at around 87% of the total population.

This research showed that 87% of consumers had their coffee at home, whereas 73% also drank coffee out-of-home.

In 2016 average coffee cups consumption in Italy was 3.1 cups a day: 1.3 in terms of 'out-of home' consumption and 1.8 related to 'at home' consumption.

7.3 Per capita consumption¹⁰

Source: Comitato Italiano del Caffè and ICO

Coffee per capita consumption experienced a positive growth trend from 2000 to 2007 when it registered a peak of 5.9 kg. This value then began to decrease until 2013 (5.66 kg) and recently continued to fluctuate slightly, reaching 5.8 kg in 2016.

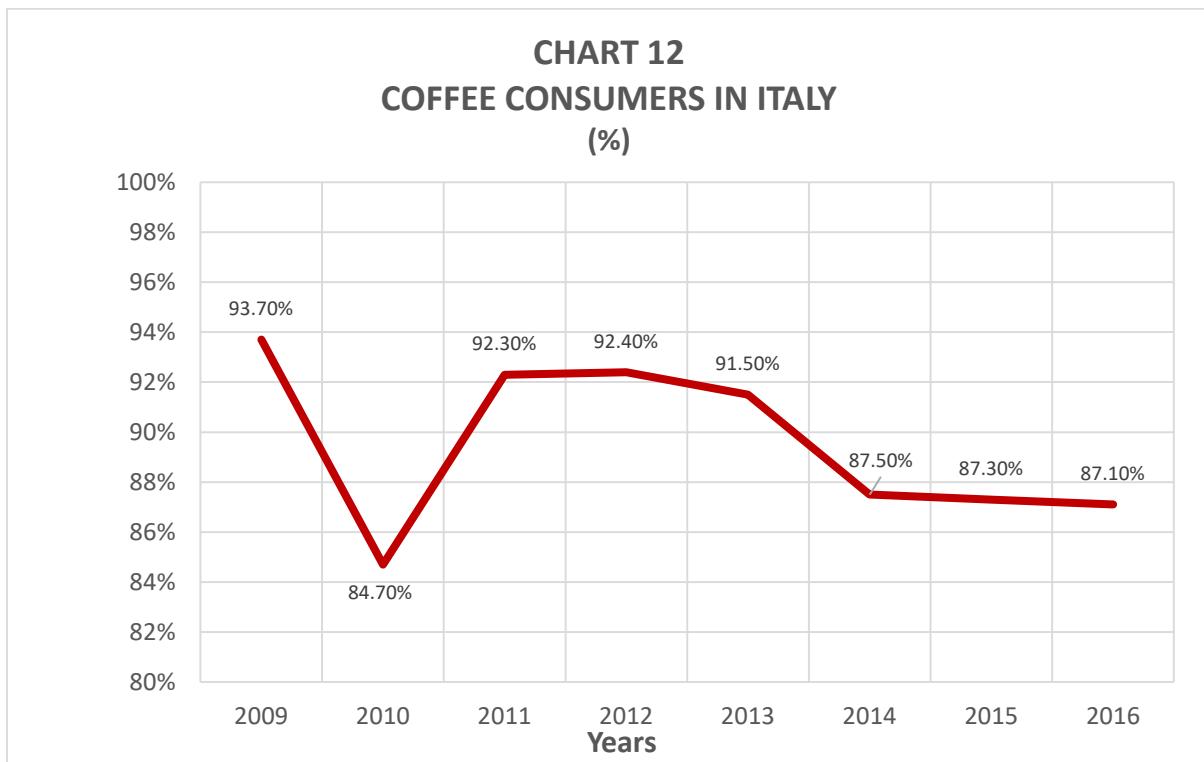

The 2015 Italian per capita coffee consumption was higher than the per capita consumption in the United Kingdom (3.3 kg) and Spain (4.5 kg), but lower than the per capita consumption of Sweden (10.1 kg) or Finland (12.2 kg)¹¹.

However, per capita consumption of coffee in Italy is in line with the European average consumption.

¹⁰ The value of per capita consumption is an estimate. It is assumed that coffee stocks in warehouses are not included in this calculation.

¹¹ Source: ICO

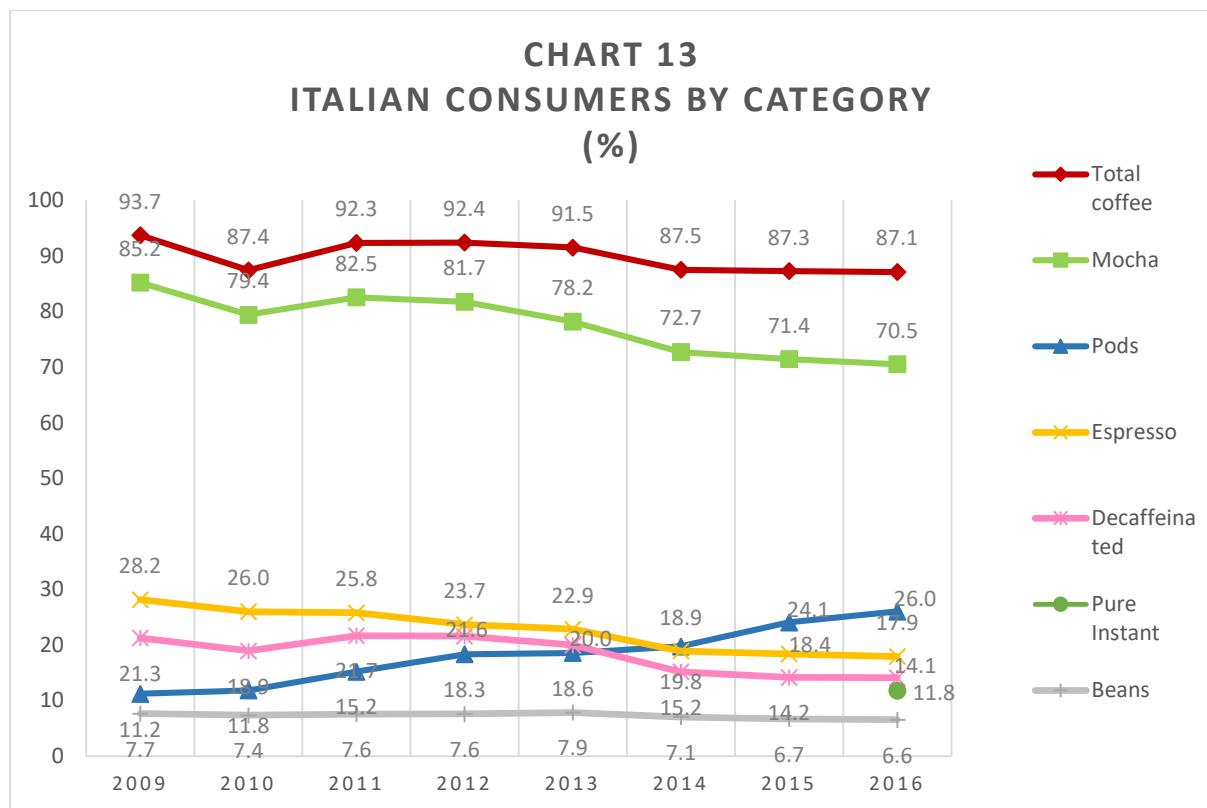

7.4 Consumer behaviour

Source: Elaboration based on Lavazza data

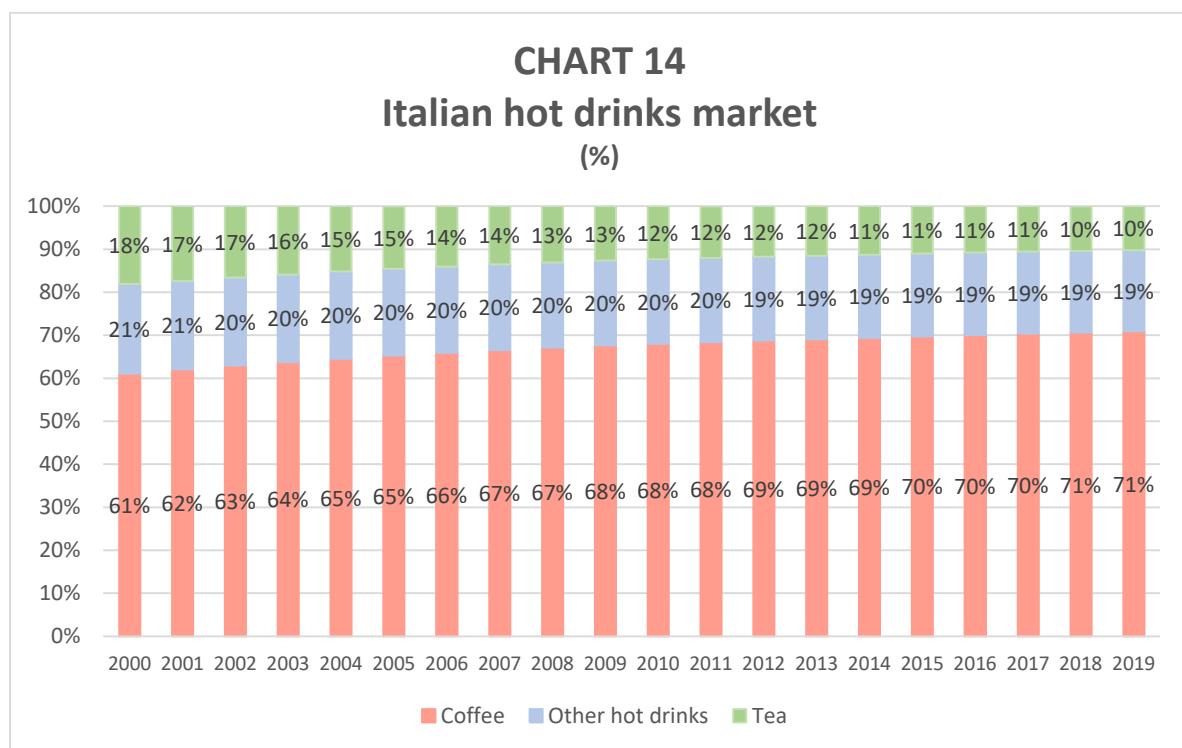

The percentage of coffee consumers in Italy decreased from 93.7% in 2009 to 87.1% in 2016, (Chart 12).

While the geographic spread of coffee consumers has remained generally constant over the years, the age of the average consumer has varied: 60+ year old consumers drink relatively more than in the past (+9% from 2010 to 2016) versus a drop in consumption by those under 30 years of age (-5% from 2010 to 2016).

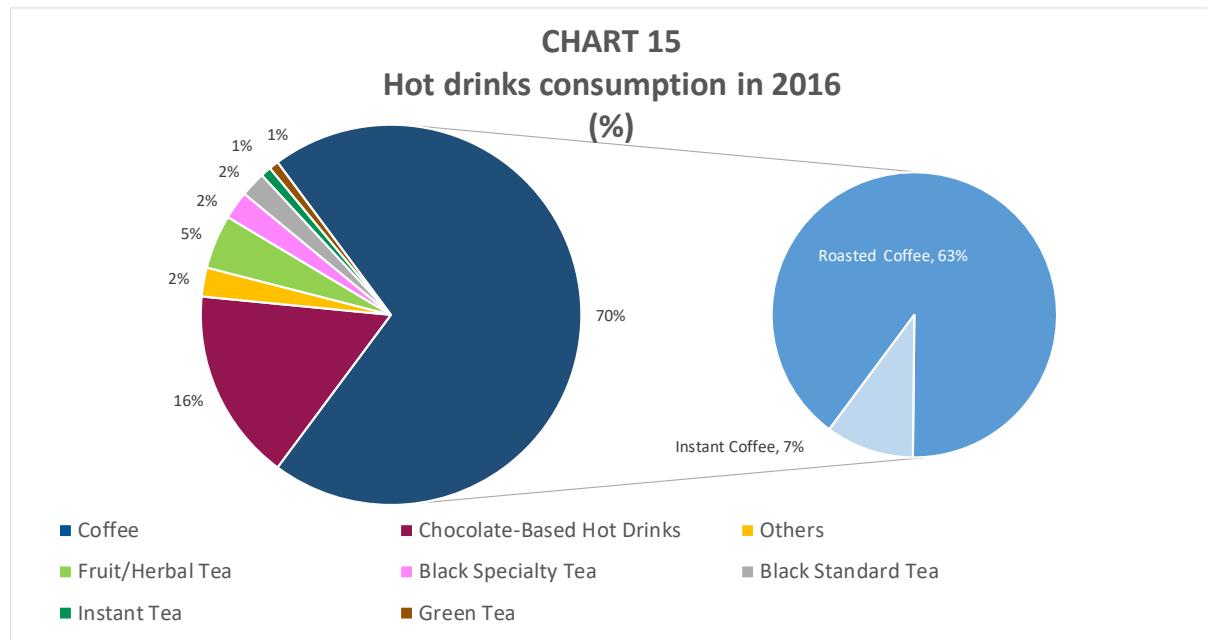

Source: Elaboration based on Lavazza data

Charts 13 shows the main trends about coffee consumers by category. Mocha consumers also dropped from 82.5% in 2011 to 70.5% in 2016. The percentage of espresso and decaffeinated consumers registered a negative trend too: espresso consumers have gradually dropped since 2010 while decaffeinated consumers increased in 2011 before declining in each subsequent year. Consumption of pods has risen steadily from 2009 to 2016 showing a +132% increase.

Source: Marketline, 2017

Source: Marketline, 2017

The hot beverage market in Italy is dominated by coffee, which represents 70% of the total market volume in 2016 (see Chart 15). 63% is related to the consumption of roasted coffee and only 7% is related to instant coffee consumption (see Chart 15).
